

## Susan Raiser Design Ltd Product Design Consultants

Susan Raiser Design Limited is an independent product design consultancy, offering design and manufacturing expertise to small and medium sized businesses.

We can help re-design existing product lines, to resolve quality, cost and production issues, and offer creative design and development of next generation products to help our customers penetrate new markets.

Our key skills include: product design & engineering, production engineering and project management.

Our principle clients to date are in the healthcare industry, specialising in medical furniture, soft play and learning tools.
